**Hello All:**

**I talked with BBB Tanks and they are doing the repair work on the tanks at the Falcon Refinery. The repair status is as follows:**

**Tank 16: Expected to be complete by end of month (repair cost about \$1,000,000)**

**Tank 12: Scope of work being prepared by LTR1 to give to BBB (repair expected to cost about \$1,500,000)**

**Tank 30: Scope of work needs to be developed but it does not appear the funding is available to do this repair at this time. (repair estimated at about \$2,000,000)**

**Waste is located in Tanks 26, 7, and 30.**

Thanks

**Gary Moore**
